

ISEEfviaICTEuropeanCompetence Evaluation

1- During our project, a questionnaire was applied after each mobility for the evaluation of European Competencies of students and teachers who participated in the local and transnational activities of the project. In this survey, our participants were asked to evaluate themselves on the degree to which they use their communication skills, their willingness to learn the common languages with basic expressions, and their development of respect and understanding of the traditions and customs of the partners. 87 of our participants responded to our European Competence Evaluation survey and the results can be viewed by following the link.

I can communicate in English with my friends from the partners countries

ISEEFviaICT Activity Evaluation for teacher

Throughout the project, the activity evaluation questionnaire for each transnational mobility was applied to the participating teachers, and the evaluation of transportation, accommodation, cultural activities and activities related to the project topic was ensured.

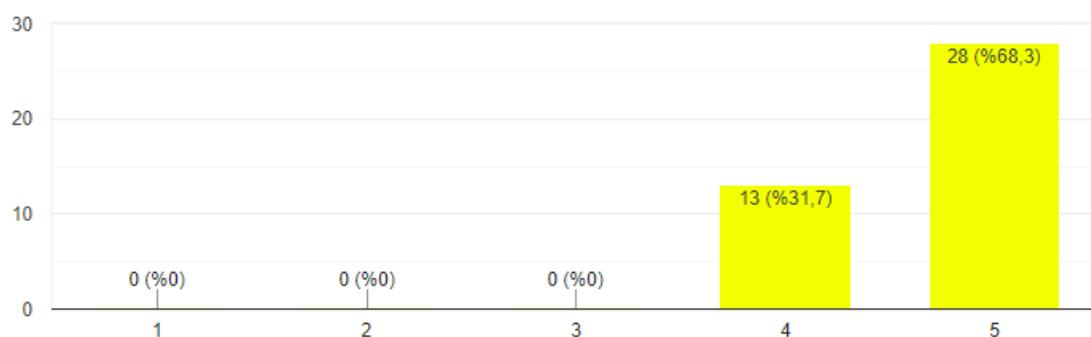

In this evaluation, especially regarding the compatibility of the project activities with the project contents, all of our participants stated that 100% of the activities reached the project objectives and were appropriate activities for creating environmental awareness
